

SALT Device - SPICE Device

Velati salt and spice devices – entirely built in stainless steel and with materials suitable for contact with foodstuffs, pursuant to MOCA regulations and the principles of Hygienic Design – have been designed to distribute salt and spices in production lines, on conveyor belts that connect the grinding phase with the mixing phase.

Thanks to the high efficiency motors and the possibility to install the inverter (option), they guarantee a perfect dosage 115 lt for a final product of the highest quality.

The model with 115 tank is equipped with an inclined screw that conveys the product to the dosing mouth, while the version with 300 liters tank is also equipped with two mixing shafts, to keep the product constantly moving and mixing to be dosed.

Loading cells available as an option.

All Velati machines are equipped with IP69k touch screen control panels with an intuitive user interface, and they can be supplied as stand-alone machines as part of new automated production lines or as part of existing lines.

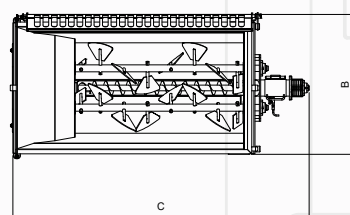

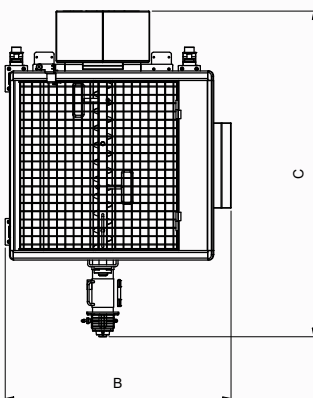

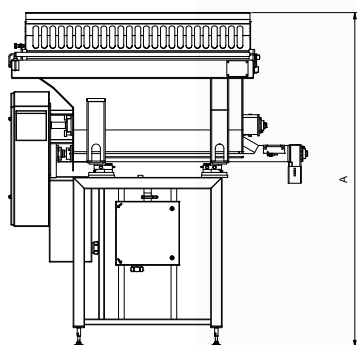

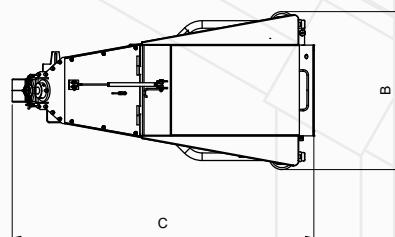

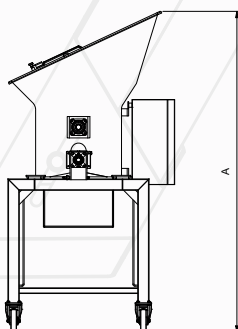

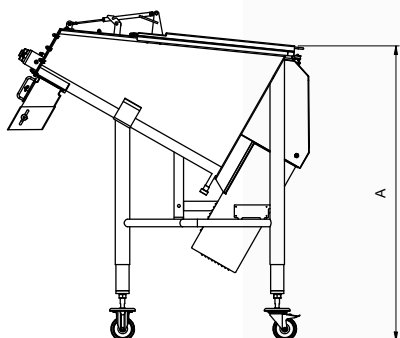

SaltDevice - SpiceDevice

TECHNICAL SPECIFICATIONS

MODEL		DOSASALE - DOSASPEZIE		
Tank capacity	l	115	250	300
Worm motor power	kW	1,1	0,75	1,5
Mixing motor power	kW		1x1,5	2x1,5
Inverter		Option		

MODEL		SALT DEVICE - SPICE DEVICE		
Tank capacity	l	115	250	300
Dimension	A	mm	1500	2300
	B	mm	850	1000
	C	mm	1600	1700

* Dimensions given in this information sheet are guidelines and may vary. Performance refers to a brand new machine, in normal climatic conditions and for use as specified in the User Manual. Different equipment may cause some values to vary.
